Subject: Build fails with freetype 2.6.3

Hi.

I tried compiling the latest stable release on Arch linux which unfortunately failed.
The problem seems to be caused by a recent change in the include guard naming in freetype
where leading underscores (__) have been removed:
sourceforge.net/projects/freetype/files/freetype2/2.6.3/
I changed the file uppsrc/plugin/FT_fontsys/ft2build.h and added the new macro name which did
the trick for me   but perhaps it should be done in another way.

#ifndef __FT2_BUILD_GENERIC_H__
#define __FT2_BUILD_GENERIC_H__

#ifndef FT2BUILD_H_
#define FT2BUILD_H_

#include <plugin/FT_fontsys/config/ftheader.h>

#endif /* FT2BUILD_H_ */

#endif /* __FT2_BUILD_GENERIC_H__ */

Thanks, however for now I am scratching my head about how plugin/FT_fontsys in involved in
building of theide?

Mirek

Via messed up includes e.g. in GtkDrawText.cpp:
[426s] In file included from uppsrc/plugin/FT_fontsys/ft2build.h:34:0,
[426s]   from uppsrc/plugin/FT_fontsys/ftoutln.h:24,
[426s]   from
/usr/src/packages/BUILD/upp/src/upp-x11-src-9482/uppsrc/CtrlCore/GtkDrawText.cpp:7:

[426s] uppsrc/plugin/FT_fontsys/config/ftheader.h:173:0: warning: "FT_FREETYPE_H" redefined
[426s] #define FT_FREETYPE_H <plugin/FT_fontsys/freetype.h>
[426s] ^

Full log from OBS is attached.

Well, I only see it in GtkDrawText.cpp.

I have fixed it by changing to

#include <freetype2/freetype/ftoutln.h>

Hopefully it will fix the issue...

Mirek

I tried a new nightly build and everything compiles now.

Thanks
Tomas
