Is it possible to set only the vertical so that all controls fit horizontally to ParentControl width?

Hello. I use modified version of ExpandFrame.

It's bit more functionality than needed, but if I decide to split into horizontal frames in some app, it's already ready!!!

Thank you Sergey

However ExpandFrame introduces two nice features, but I only wanted one of them:

I have tried to use ExpandFrame like a AutoScroller but unsuccessfully.

May be you need use Layout virtual function to make as You want?
(Sometimes I do this.)
