
Subject: Compile error in Ole\util.cpp on fresh installation

I tried to compile OleCalc example with MSCV15 and got this compile error:

Ole\util.cpp (line 240) error C2440: '<function-style-cast>': cannot convert from

'Upp::Vector<Upp::Value>' to 'Upp::ValueArray'

It seems like the line "return ValueArray(dim_array);" ought to be replaced with "return dim_array;"

This should be now fixed.
