Subject: ArrayCtrl::GetCellRect is private

For some some reason ArrayCtrl::GetCellRect is declared as private.
The only similar public method is ArrayCtrl::GetScreenCellRect.
Inside of a Display::Paint method I'm getting cell Rect (not screen cell Rect) I believe.

So, if I'm using my own Draw method, and after that I want to detect on which part of a cell a user clicked, then I do not have an easy way to do that.
And in the method LeftDown I'm getting not screen coordinates either.

IMHO, ArrayCtrl::GetCellRect should be public, or I'm missing something.

TIA
