gui , how to switch between the visual dlg.lay to the text view of the dlg.lay file

I used this before but do not remember.

Neil

ide help === ide keys   ctrl + t

edit: The 'default' of adding the Z still seems like a bug to me.   I lost several more hours chasing this down again.   Is there a way to turn the 'default' off so the Z will not be automatically added?

Hello nlneilson,

In last release (2015.2) we improved TheIDE by adding button to switch between text/designer/hex view. You can find it near navigation icon (TheIDE toolbar).

This is the list of the options:
- Edit as text
- Edit using designer
- Edit as hex

Icons:

To switch to text mode just select first icon.

Sincerely,
Klugier

Thanks Klugier - that is a good improvement

In the text mode there is much finer control of the size and position of the little boxes, that is what I need.

Using ctrl + T is not as positive and on my computer it has to be the right ctrl and not the left
