Hi,

I tried to compile my project after updating my system to UPP9950. The MSC15 compiler complains the following error:

..\upp\bazaar\Controls4U\Controls4U.cpp (1940): error C2440: 'initializing': cannot convert from 'Upp::FileBrowser::EditStringLostFocus' to 'Upp::String'

The problem seems to be the code in Control4U.cpp file.

```
void FileBrowser::FileNameWhenChanged() {
 String kk = fileNameSelected;  // Nombre viejo path completo
 String koko = textFileName;   // Nombre nuevo (solo nombre)
 int de = 34;
}
```

Hope it could help to solve the error

Regards
Biobytes

Hello,

It is interesting - why you have method that assign member variables and do nothing special with that. For me it seems like dead code - but maybe I ma wrong. Can you explain it for me - Koldo

If the code is not used - I highly recommended to delete it.

Sincerely,
Klugier

Yes absolutely I will delete it.

In addition I will have to upload some changes in all EditString:

EditString editString;

- Until now:
String str = editString;

- From now:
String str = ~editString;

Sorry for the inconveniences. I will upload them today.

Hi Koldo,

Just updated my system to UPP 9977 and everything compiles perfectly

Thank you very much for your help

Cheers
