Hello in this magic occasion,

I think we are slowly approaching the 10 000 commits of U++. It is definitely huge milestone and big achievement for our community. Each commit is special and matters. He brings something new or improve existing things.

The most important question - how you will celebrate this event? Let us know that you still like and enjoy U++ - by simply commenting in this topic or doing something else - maybe posting photo with birthday cake.

For me, I would like to thanks U++ for this 4 years. I have learn here a lot. Wrote my master thesis... Learn how to write post in English. Thanks! Of course, I would like to thanks Mirek for mentoring.

I would like to also thanks all people that contribute to our framework and the people who use it. Good job Guys! Together we are stronger.

Sincerely and thanks one more time,

Hi Klugier and all U++ guys,

That is true that U++ is a wonderful programming tool. As a biologist, I learned a lot of things in C programming and had a lot of fun. I started really with Pascal (lazarus) as I was a bit afraid by C++.

However Ultimate made learning easier and the community is very concerned and helpful.

Long life to U++

Cheers
