
Subject: <build_info.h> can't be included in .rc file

If I put
#include <build_info.h>

in myapp.rc then the microsoft resource compiler chokes on it because the last line in the file doesn't have a "\r\n"

I am using the most recent stable version.

Ok, I added a line to CppBuilder.cpp

```
Vector<String> SvnInfo(const String& package)
{
    Vector<String> info;
    String d = GetFileFolder(PackagePath(package));
    if(IsSvnDir2(d)) {
        String v = Sys("svnversion " + d);
        if(IsDigit(*v))
            info.Add("#define bmSVN_REVISION " + AscString(TrimBoth(v)));
        v = Sys("svn info " + d);
        StringStream in(v);
        while(!in.IsEof()) {
            String l = in.GetLine();
            if(l.StartsWith("URL: ")) {
                info.Add("#define bmSVN_URL " + AscString(TrimBoth(l.Mid(5))));
                break;
            }
        }
    }
}
```

```
    info.Add(""); // Line I added so that the files terminate with \r\n
}
return info;
}
```

That fixes the issue
