Hello,

I have just created one more internal article (almost done) - U++ technologies. It mainly focuses on all technologies that belongs to U++ framework like Skylark, CtrlCore and TheIDE. It shows in straight way how everything is organized.

It would be nice to hear your feedback guys.

Sincerely,
Klugier

Good article.

It would be possible to add more links from the article to the different technologies :roll:

Somebody should fix the english... :)

Painter/Draw are GUI independent. Maybe "Graphics"?
