Added:

- Reference: gui_tutorial
- Thelde: Transpose characters, Copy word In Edit/Special menu
- File selector: now "displays" /media/cdrom etc with appropriate icons and folder droplist list them as well
- SqlExp: OFFSET-LIMIT clauses
- MapConvert, DropList: operator[]
- Esc: to_number standard library function

Modified:

- XmlNode: no exceptions anymore

Fixed:

- reference/Events, reference/Common: compilation problems
 - TheIDE: crash when deleting additional file-specific dependencies
-

I've tried to compile it on Linux and there is an error:

```
TopWinX11.cpp
/home/ivica/upp/uppsrc/CtrlCore/TopWinX11.cpp: In member function `void
  TopWindow::SyncCaption()':
/home/ivica/upp/uppsrc/CtrlCore/TopWinX11.cpp:135: error: `XA__NET_WM_ICON'
  undeclared (first use this function)
/home/ivica/upp/uppsrc/CtrlCore/TopWinX11.cpp:135: error: (Each undeclared
  identifier is reported only once for each function it appears in.)
```

```
TopWinX11.cpp
/home/ivica/upp/uppsrc/CtrlCore/TopWinX11.cpp: In member function `void
  TopWindow::SyncCaption()':
/home/ivica/upp/uppsrc/CtrlCore/TopWinX11.cpp:135: error: `XA__NET_WM_ICON'
```

undeclared (first use this function)
/home/ivica/upp/uppsrc/CtrlCore/TopWinX11.cpp:135: error: (Each undeclared
identifier is reported only once for each function it appears in.)

Sorry... as there is another bug in TheIDE, looks like we will have to release RC2 soon

Mirek

Modify the line 135 as below should fix the problem

```
XChangeProperty(Xdisplay, w, XAtom("_NET_WM_ICON"),XAtom("XA_CARDINAL"), 32,  
PropModeReplace,  
                (const unsigned char *)~data, len);
```
