In related news...

Ide now wordwraps comments and is able to reformat comment block.

Godd job ;)

Is language configurable ?

How do we turn it on ?

I just compiled the lates version and I can only configure it OFF.

Probably some dictionary files missing

I just compiled the latest version and I can only configure it OFF.

Probably some dictionary files missing

Yes, you need dict files (e.g. in executable folder). EN-US is normally part of installation, at least in Windows. You can download more here:

<https://sourceforge.net/projects/upp/files/SpellerDictionaries/Aspell/>
