simmxtools v0.1:

some usefull stuff, usage:

-simmxtools -help

-simmxtools <=will read config.txt

-simmxtool "keywords", eg: simmxtools "msgbox:'hola'" or

simmxtools "run:'cmd /c notepad\nplacewindow:'notepad',1,2000" <= will wait for notepad start max 2sec

simmxtools "run:'cmd /c

notepad\nplacewindow:'notepad',1,2000"\nsendkeys:'hello{SPACE}from{SPACE}simmxtools!'"

will execute notepad and write text in it

plug can be created simply with regular dll, 2 functions must be defined:

-INT32 plugInitKeywords(char \*\*ptrtokeywordsnullterm)

-INT32 plugOnKeyword(DWORD keywind,DWORD numArgs,Pgn pgn,Pgs pgs,Pgr pgr,Psr psr,pluginter &pi)

known bug:

-upp version of dll sample crashes, even on simple call PromptOK("str");

Usage:

Unzip and click simmxtools.exe.

'sendkeys' key ids are in note.txt

Tool is also available here:

<https://ws-tools.000webhostapp.com/>
