I have changed the style how Core tutorial is created (it is now generated from the code, you can check in tutorial/CoreTutorial). The result is here:

http://www.ultimatepp.org/srcdoc$Core$Tutorial$en-us.html

Mostly the themes are converted and fixed from the older tutorials (Core and NTL), but there are some new additions.

This is work in progress, I appreciate

- error reports
- suggestions for new themes
- maybe even the themes themselves (check CoreTutorial, they are simple to create).

Hello,

Let's change the size of title for example "1. Logging" - it is definitely too small and should adjust to the other articles.

Sincerely,
Klugier
