v10977

when debugging and trying to watch a variable with Watch...,
sizing the window will show misplaced ok/cancel buttons

Sorry, I downloaded the latest U++ version, but the Watch window is not sizable.

I don't know how you managed to resize it...

ahh, i forgot to mention that this is for linux 64bit version.

By the way, is there a way in windows to show variables like in linuxVer,
so that when using Watch... - whole struct is viewable in panel?
Quite handy when forEx checking a little longer string
