Hello,

I forced problem when compiling Unique from bazaar. The problem is that I can not bind Event to Post callback. Here is the problem:

```
Event<const Vector<String>&> WhenInstance; // Class member
```

```
PostCallback(WhenInstance, v); // How to post that callback, do i need something like std::bind?
```

All help is welcome :)

---

Solution:

```
PostCallback([=, &v]() { WhenInstance(v); } );
```

Sincerely,  
Klugier
