U++ - Bug #1052
RichEdit::Print() fails when RichEdit is Floating()

Description

When printing RichEdit(), if Floating() is set, print is shifted to the middle of the page.

How to test:

- Open UWord and add editor.Floating(1); in UWord constructor
- Writ something and press Print

Reason:
RichEdit::Print() calls UPP::Print() with pagesz. Unfortunately when calling Floating(), RichEdit::Layout() does a SetPage() with cy = INT_MAX , so RichEdit::Print() shifts the printing.

Quick and dirty solution:
Set return UPP::Print(text, Size(3968, 6074)/*pagesz*/, cursorc.page); in RichEdit::Print()
