Target version:		Spent time:	0.00 hour
Description			
<p>In current ndk implementation there are three version of gnu-libstdc++: 4.6, 4.7 and 4.9; It should be some kind of algorithm to detect the best fitted version.</p> <p>Currently path generation process looks like this:</p> <pre>String versionsDir = nest + "gnu-libstdc++"; return nest + "gnu-libstdc++" + DIR_SEPS + "4.6" + DIR_SEPS + "include";</pre>
