

U++ - Bug #142

Why is uppweb compilation of web.cpp in linux taking so long?

10/24/2011 09:00 AM - Miroslav Fidler

Status:	Rejected	Start date:	10/24/2011

Target version:		Spent time:	0.00 hour
Description			
and wastes so much memory?			

History

#1 - 10/24/2011 10:30 AM - Sender Ghost

- File *uppbox.diff* added

Circular dependencies?

I created a patch to clean **uppweb** package a little.

#2 - 10/24/2011 11:24 AM - Sender Ghost

- File *uppbox2.diff* added

Clean up a little more.

#3 - 10/24/2011 12:10 PM - Sender Ghost

- File *uppweb_fix.diff* added

- Status changed from New to In Progress

And some fix for [uppweb/www.cpp](#) file.

#4 - 10/24/2011 02:02 PM - Sender Ghost

Ok, found. This is because of [following fragment of code](#):

```
#define TOPICFILE <uppweb/www.tpp/all.i>
```

```
#include <Core/topic_group.h>
```

```
#define TOPICFILE <ide/app.tpp/all.i>
```

```
#include <Core/topic_group.h>
```

The preprocessor.

#5 - 10/24/2011 02:20 PM - Sender Ghost

- File *deleted (uppbox2.diff)*

#6 - 10/24/2011 02:23 PM - Sender Ghost

- File *uppbbox2.diff* added

Fixed second version of the clean-up patch (which not very related for this issue).

#7 - 10/26/2011 09:43 AM - Miroslav Fidler

Well, looks like it would be smart to rewrite the code not to include topics, just load them during the run...

#8 - 10/26/2011 03:58 PM - Sender Ghost

If I comment out these defines, I get almost the same generated pages (except update time stamp for **index.html** file and

[www\\$upweb\\$examples\\$<language>.html](#) files).

I recommend to switch **ide** package to **ide/Browser** for **upweb** uses, then it will be just 21 packages to build, instead of 39. And use separately opened TheIDE to edit **ide/app.tpp** topics instead.

#9 - 10/26/2011 06:38 PM - Sender Ghost

- File *uppbbox_full.diff* added

- Status changed from *In Progress* to *Patch ready*

Therefore, there is full version of the patch with all changes.

#10 - 10/26/2011 06:38 PM - Sender Ghost

- File *deleted (uppbbox_full.diff)*

#11 - 10/26/2011 06:39 PM - Sender Ghost

- File *uppbbox_full.diff* added

Just changed description of the attached file.

#12 - 10/26/2011 09:22 PM - Sender Ghost

- File *deleted (uppbbox_full.diff)*

#13 - 10/26/2011 09:24 PM - Sender Ghost

- File *uppbbox_full.diff* added

Fixed patch a bit.

#14 - 11/04/2011 10:24 AM - Miroslav Fidler

- Status changed from *Patch ready* to *New*

- Priority changed from *High* to *Normal*

(switching to 'new'/'Normal' as provided patch does not solve the original problem and the issue is not pressing....)

#15 - 03/31/2013 03:22 PM - Miroslav Fidler
- Status changed from New to Rejected
