| <p>In the Notepad++ there is one key feature - find all occurrences of given "string" in text. It is super helpful with log analyzing.</p> <p>We should have similar feature in our TheIDE. It will be supper powerful with log syntax...</p> |                 |                        |            |
