Description			
<p>When designing GUIs, a lot of small frames and spacing is used for aesthetics.</p> <p>You often create a "border" of indents around some GUI element to highlight it. The border I'm designing is broken by TabCtrl's scrollbar.</p> <p>With TabBar::AddFrameToScroolBar:</p> <pre>void AddFrameToScroolBar(CtrlFrame&amp; fr)      { sc.AddFrame(fr); }</pre> <p>one can shift the scrollbar around and add borders to it.</p> <p>Very minor issue, the difference is only a few pixels, but aesthetics is aesthetics...</p>
