Description			
<p>Currently, we have problem in our documentation that we have too long pages and navigation is hard. For example on one page I have got 30 tutorials I need to scroll to find the one I am interested in. The solution for that problem is to implement "Table of Contents" feature for RichText and RichEdit.</p> <p>Example of tables of contents:</p> <p>Contents</p> <ul style="list-style-type: none">1 Getting Started with IRC2 Community/Support3 Communities by Country4 Communities around a distribution5 Applications <p>Acceptance criteria:</p> <ul style="list-style-type: none">- In browser user should be able to jump to title that she/he is interested.
