History

#1 - 02/24/2017 09:03 PM - Sender Ghost

- Assignee set to Miroslav Fidler

The [-Wunused-macros](#) compiler's option returned following warnings for uppsrc/CtrlCore/GtkX11Util.cpp file:

GCC 4.9.4:

```
<...>/uppsrc/CtrlCore/GtkX11Util.cpp:13:0: warning: macro "CurrentTime" is not used [-Wunused-macros]
#define CurrentTime XCurrentTime
    ^
<...>/uppsrc/CtrlCore/GtkX11Util.cpp:12:0: warning: macro "Picture" is not used [-Wunused-macros]
#define Picture    XPicture
    ^
```

Clang 3.4.1:

```
<...>/uppsrc/CtrlCore/GtkX11Util.cpp:13:9: warning: macro is not used [-Wunused-macros]
#define CurrentTime XCurrentTime
```

```
^
In file included from <...>/uppsrc/CtrlCore/GtkX11Util.cpp:15:
In file included from /usr/local/include/gtk-2.0/gdk/gdkx.h:32:
In file included from /usr/local/include/X11/Xlib.h:44:
/usr/local/include/X11/X.h:139:9: warning: 'CurrentTime' macro redefined
#define CurrentTime    0L /* special Time */
^
<...>/uppsrc/CtrlCore/GtkX11Util.cpp:13:9: note: previous definition is here
#define CurrentTime XCurrentTime
^
<...>/uppsrc/CtrlCore/GtkX11Util.cpp:12:9: warning: macro is not used [-Wunused-macros]
#define Picture    XPicture
^
3 warnings generated.
```

Looks like, the CurrentTime define was available in X.h file from 2003 year (or earlier in the other version control system):

<https://cgit.freedesktop.org/xorg/proto/xproto/tree/X.h?id=ee0a1a43dc707f960e637fdf2118723e4de0a55d#n119>

<https://cgit.freedesktop.org/xorg/proto/xproto/log/X.h>

Nevertheless, the Picture and CurrentTime defines was added to uppsrc/CtrlCore/GtkX11Util.cpp file for some purpose (in [5718](#) and [5721](#) revisions).

Overall, this is just a warning messages, about which I reported here. Looks like, they didn't cause issue(s) and may be ignored, if there are some use case(s) for such define(s) in different environment.
