Description			
http://www.ultimatepp.org/forums/index.php?t=msg&#38;goto=47744&#38;#msg_47744			
<p>Hi,</p> <p>I have to install upp in Program Files, so I found the following two bug:</p> <p>1: gdb does not find the exe file</p> <p>solution: add quote before and after the path of the exe file in ide\Debuggers\Gdb.cpp line 338 Code: [Select all] [Show/ hide]</p> <pre>dbg = host->StartProcess(GdbCommand(console) + "\"" + GetHostPath(exefile) + "\"");</pre> <p>2: windres does not find the preprocessor in it's internal, windres use it's path (without quotes) as base in order to find the propessor. solution: call windres using it's ShortPath: in ide\Builders\GccBuilder.cpp, line 217: Code: [Select all] [Show/ hide]<pre>exec << GetHostPathShort(FindInDirs(((LocalHost*)host)->exedirs, "windres.exe")) << " -i " << GetHostPathQ(fn);</pre><p>instead of: Code: [Select all] [Show/ hide]</p><pre>exec << "windres -i " << GetHostPathQ(fn);</pre></p>
