

## U++ - Task #1747

### MacroManager should allow import, export (global operations) and edit (local operation) through tree bar

06/17/2017 10:14 PM - Zbigniew Rebacz

<b>Status:</b>	Approved	<b>Start date:</b>	06/17/2017

<b>Target version:</b>	Release 2017.2 - NTH	<b>Spent time:</b>	0.00 hour
<b>Description</b>			
<p>This is minor MacroManager interface improvement.</p> <p>The menu bar should look like this:</p> <ul style="list-style-type: none"><li>- New macro file..</li><li>- Delete macro file..</li><li>- Import macro file..</li><li>- Export macro file</li><li>- -- Separator --</li><li>- Edit</li></ul> <p>For each operation I would like to have helpers in the class for example (conceptual implementation - the method name could be different):</p> <ul style="list-style-type: none"><li>- IsDeleteMacroFilePossible()</li><li>- IsExportMacroFilePossible()</li><li>- etc.</li></ul> <p>When these helpers will be done it should also be used in buttons sections. It will simplify our code architecture and will make it more elastic for the future UI changes.</p>
