Description			
<p>The case:</p> <ol style="list-style-type: none">1. File with "Default" encoding (or another one, except "UTF-8 BOM").2. TheIDE -> "Convert to encoding..". Select "UTF-8 BOM".3. In result, TheIDE prepends 3 chars (with BOM) to beginning of the file. CodeEditor shows 3 empty chars.4. TheIDE -> "Convert to encoding..". Select "Default".5. In result, the BOM chars still there, but encoding is "Default".

I raised the priority of Bug, because this is not "Convert to "UTF-8 BOM" encoding" issue, which is a consequence.
The patch solves the cause. Without the patch, "UTF-8 BOM" feature doesn't work.
