

U++ - Task #1840

System notification should not be limited only to tray icon

02/18/2018 09:21 PM - Zbigniew Rebacz

Status:	New	Start date:	02/18/2018
Priority:	High	Due date:	
Assignee:	Miroslav Fidler	% Done:	0%
Category:	CtrlCore	Estimated time:	0.00 hour
Target version:	Release 2021.1 - NTH	Spent time:	0.00 hour
Description			
Application should be able to send system notification without the need of use TrayIcon class. <pre>class TrayIcon { void Info(const char *title, const char *text, int timeout = 10) { Message(1, title, text, timeout); } void Warning(const char *title, const char *text, int timeout = 10) { Message(2, title, text, timeout); } void Error(const char *title, const char *text, int timeout = 10) { Message(3, title, text, timeout); } };</pre> So, this can be moved to CtrlCore as a separate method class like: <pre>class Notification final { public: Notification() = delete; static Info(...) {...} }</pre>
