Description			
<p>It seems that drag and drop for icon designer doesn't work as expected. It works sometimes for me, but in most case it doesn't. To reproduce just try to randomly use drag and drop (up and down). I think down dragging is more stable, but it doesn't work for all cases.</p> <p>Reproducibility: 70% - sometimes it works sometimes it doesn't. Would be good to test layout editor in certain case it doesn't work there, but it is much more stable.</p>
