Description			
<p>It seems that FileSelButton is missing one big feather - tooltip. I highly suggest to change following line (CtrlLib/CtrlUtil.cpp):</p> <pre>button.SetImage(CtrlImg::right_arrow()).Tip(t_("Select path.."));</pre> <p>.. - means that dialog will be open.</p> <p>Well, TheIDE code is not perfect and sometimes this class is use and sometimes it is added by hand. Anyway, after applying we should refactor TheIDE to use only FileSelButton.</p>

This require more work - probably adding virtual method Tip() would solve the issue.

IMO not a good idea. Better to add tip on per usage base in client code ("Open new source file..")

Anyway the Tip method doesn't work for FileSelButton. You need to set it for FrameRight<Button> button; not for Ctrl. Mirek can you add such functionality?
