U++ - Bug #233
MSC Builder error when linker command line too long

01/14/2012 03:33 PM - Massimo Del Fedele

Status:	Approved		**Start date:**	01/14/2012

Target version:			**Spent time:**	0.00 hour

Description

Building a big library with many object files, MSC linker complains about too long command line (> 8192 chars in XP+)

Attached patch removes this limit, using a command file when line is > 8192 characters; when shorter the usual path
is preserved.
The patch attached corrects also bug of issue 232 for MSC compiler; solution for GCC is still in 232 issue.
