U++ - Task #244
Rewrite the deb packaging

01/26/2012 09:03 PM - Jan Dolinár

Status:	Approved		**Start date:**	01/26/2012
Priority:	Immediate		**Due date:**	
Assignee:	Jan Dolinár		**% Done:**	50%
Category:	General		**Estimated time:**	0.00 hour
Target version:			**Spent time:**	0.00 hour

Description

The goal is to rewrite the stuff in uppbox/lpbuild to match current debian packaging standards.

- % Done changed from 0 to 50

Mirek:

Could you please check the settings in lpbuild2/lpbuild.sh and try to launch it within the nightly builds? The only requirement is that it must be launched after the source tarball is built and $SRCDIR must point to the directory where the tarball can be found. The other settings should work fine with the values I guessed. PM/IM me if in doubt...

How it works:

  - First looks into $SRCDIR and finds tarball with highest version number.
  - Checks whether this version packages were already built (exits in that case) or not.
  - Copies the contents of tarball and some other necessary files into temporary directory
  - Creates debian source packages for the five supported ubuntu distributions and immediately uploads them to launchpad.

Currently the uploads are set to go to my testing PPA, so regular users will not be affected at all. Once we have this running in the "testing mode", I'll continue with the development to tweak all the errors that might arise, hopefully ending with something eligible for inclusion to official debian repos :)

#2 - 01/27/2012 10:51 AM - Miroslav Fidler

- Priority changed from Normal to Immediate

#3 - 01/30/2012 09:53 PM - Jan Dolinár

I changed the architecture slightly to allow better code reusing and to move configuration to separate file. The configuration is in nightly.cfg, each entry is documented, so it should be no problem. The lpbuild script now should be launched with the config file as parameter:

bash ~/upp.src/lpbuild2/lpbuild.sh ~/upp.src/lpbuild2/nightly.cfg

Sorry for inconvenience Mirek, I thought I'll make the changes in time, before you get time to set it up...

#4 - 01/31/2012 08:16 PM - Miroslav Fidler
