

U++ - Bug #259

ide crashing with not closed #ifdef (?)

02/24/2012 07:30 PM - Miroslav Fidler

Status:	Rejected	Start date:	02/24/2012
Priority:	Immediate	Due date:	
Assignee:	Miroslav Fidler	% Done:	0%
Category:	IDE	Estimated time:	0.00 hour
Target version:		Spent time:	0.00 hour
Description			
<p>What I did find, though, is that a source file with a define that is not properly closed (when you forget to add an #endif) has the potential to crash the IDE with an 'Out of memory' exception.</p> <p>I also observed this same problem with a namespace that was not properly closed.</p> <p>http://www.ultimatepp.org/forum/index.php?t=review&#38;goto=35522#msg_35522</p>
