U++ - Feature #266 Breakpoints in templates

03/19/2012 03:57 PM - Iñaki Zabala

Status: Start date: New 03/19/2012 **Priority:** Low Due date: Assignee: % Done: Miroslav Fidler 0% Category: Debugger **Estimated time:** 0.00 hour Target version: Spent time: 0.00 hour

Description

Nowadays it is possible to set breakpoints in templates but they do not stop program process.

A dirty trick is to put in the template to debug a call to a dummy function located in a .c file, and to put the breakpoint in that function.

However to install this feature will be great:).
