Description			
<p>RichTextCtrl and RichEdit have different clipboard behaviour.</p> <p>RichTextCtrl Copy() only takes the text</p> <p>RichEdit Copy() takes text, fonts, Images and RichObjectType. However a RichObjectType can be pasted right into a RichEdit but not into a word processor.</p> <p>It would be great if:</p> <ul style="list-style-type: none">- RichTextCtrl would copy all and not only text- RichEdit would copy RichObjectType so that they could be pasted in a word processor (as an image).
