U++ - Feature #573
"Select All" command should have separate icon

11/14/2013 12:53 PM - Zbigniew Rebacz

Description

I thkink we should add "select_all" icon to CtrlLib (Ctrl.iml file). Why we need to do this? For example: IDE uses "copy" icon to describe "select all" action. The other area where we can use this icon is EditCtrls bars (Optional use!!!).

At the end I enclose path for the IDE (idebar.cpp - line 206):

```
(menu.*add)("Select All", CtrlImg::select_all(), callback(&editor, &LineEdit::SelectAll));
```

History

#1 - 11/14/2013 12:54 PM - Zbigniew Rebacz

- Status changed from New to Ready for QA

#2 - 11/15/2013 06:57 PM - Zbigniew Rebacz

- File deleted (Ctrl.iml)

#3 - 11/15/2013 07:00 PM - Zbigniew Rebacz

- File Ctrl.iml added

Of course, we can change icon design. But, when I was created this icon concept I heavily modeled on general upp icons design.

#4 - 11/15/2013 07:39 PM - Zbigniew Rebacz

I found one more little bug.

```
(menu.*add)("Select all", CtrlImg::select_all(), callback(&editor, &LineEdit::SelectAll));
```

We need to change "Select All" to "Select all"!

#5 - 11/16/2013 12:34 PM - Zbigniew Rebacz

- % Done changed from 90 to 100

One more little improvement for ide (Key shortcut - sidebar.cpp - line 206):

```
(menu.*add)("Select all", CtrlImg::select_all(), callback(&editor, &LineEdit::SelectAll))
   .Key(K_CTRL_A);
```

For me this patch is finished. I updated icon design (It can be seen by downloading Ctrl.iml file). Moreover I improved idebar source code.

#6 - 11/16/2013 12:53 PM - Miroslav Fidler

Implemented, in a little bit wider sense... Please check and approve (or return to me as "New").

Note: Next time, use status "New" or "Patch ready" in this situation...

Hello Mirek,

You should also add "Ctrl Img::select_all()" to EditField::StdBar:

```
void EditField::StdBar(Bar& menu) {
    menu.Add(IsEditable(), t_("Undo"), THISBACK(Undo))
        .Key(K_ALT_BACKSPACE)
        .Key(K_CTRL_Z);
    menu.Separator();
    menu.Add(IsEditable() && IsSelection(), t_("Cut"), CtrlImg::cut(), THISBACK(Cut))
        .Key(K_SHIFT_DELETE)
        .Key(K_CTRL_X);
    menu.Add(IsSelection(), t_("Copy"), CtrlImg::copy(), THISBACK(Copy))
        .Key(K_CTRL_INSERT)
        .Key(K_CTRL_C);
    menu.Add(IsEditable() && IsClipboardAvailableText(), t_("Paste"), CtrlImg::paste(), THISBACK(Paste))
        .Key(K_SHIFT_INSERT)
        .Key(K_CTRL_V);
    menu.Add(IsEditable(), t_("Erase"), CtrlImg::remove(), THISBACK(Erase))
        .Key(K_DELETE);
    menu.Separator();
    menu.Add(GetLength(), t_("Select all"), CtrlImg::select_all(), THISBACK(SelectAll))
        .Key(K_CTRL_A);
}
```

#9 - 11/16/2013 06:45 PM - Miroslav Fidler

- Status changed from Ready for QA to Approved

thanks.

#10 - 11/17/2013 12:32 AM - Zbigniew Rebacz

- Status changed from Approved to New

Hello Mirek one more time,

Can we revert GridCtrl code to previous version? Here is explanation why this is good idea:

```
void GridCtrl::SelectMenu(Bar &bar)
{
   bar.Add(total_rows > fixed_rows, RowFormat(t_("Select all")), CtrlImg::select_all(), THISBACK(DoSelectAll)) // <- Adding here "sellect_all" do nothing, because,.
      .Image(GridImg::SelectAll()) // <- Icon is overwrited in this place one more time.
      .Help(t_("Select all table rows"))
      .Key(K_CTRL_A);
}
```

Personally, I think "GridImg::SelectAll()" is better solution than "CtrlImg::select_all()", beacuse it better fits to other Grid icons like "Modify", "Duplicate" etc.

Moreover, Dider found the issue with encoding in GridCtrl update. More information you can find on:
http://www.ultimatepp.org/forum/index.php?t=msg&goto=41230&#msg_41230.
