

U++ - Feature #655

ChHostSkin(GTK) when Qt is detected should highlight menubar topitem[1]

01/20/2014 02:58 PM - Zbigniew Rebacz

Description			
The topic behavior is default for Qt & KDE, so I think it would be nice if we change ChHostSkin a little bit on KDE. Here is the code: <pre>if(Qt) GtkCh(s.topitem[1], sw, GTK_STATE_PRELIGHT); else s.topitem[1] = s.topitem[2];</pre> Moreover this patch uses gtk_check_version function instead of constants variables (gtk_major_version etc.).			

History

#1 - 01/21/2014 02:38 AM - Zbigniew Rebacz

- File deleted (ChGtk.cpp)

#2 - 01/21/2014 02:42 AM - Zbigniew Rebacz

- File ChGtk.cpp added

Additional fix:

```
if(Qt)
    s.topitemtext[1] = ChGtkColor(2, top_item);
else
    s.topitemtext[1] = ChGtkColor(0, top_item);
```

#3 - 01/27/2014 02:45 PM - Miroslav Fidler

- Status changed from Patch ready to Approved
