

U++ - Bug #680

Should FileSels list use option NoRoundSize()?

02/04/2014 04:34 PM - Zbigniew Rebacz

Status:	Rejected	Start date:	02/04/2014
Priority:	Normal	Due date:	
Assignee:	Zbigniew Rebacz	% Done:	0%
Category:	CtrlLib	Estimated time:	0.00 hour
Target version:		Spent time:	0.00 hour
Description			
<p>Personally, I think that it would be good if FileSels list will start using NoRoundSize flag. Why? Because, without this option list is not well fitted in window structure. This is strange, because file list ctrl can be a little bit shorter than places list ctrl.</p> <p>So, let's add additional line of code(FileSel.cpp - FileSel::FileSel() - line 2039):</p> <pre>list.AutoHideSb(); list.NoRoundSize(); // <- New option! places.AutoHideSb();</pre> <p>But, maybe for some resons current behavior is intentional?</p>			

History

#1 - 02/04/2014 07:19 PM - Miroslav Fidler

- Status changed from Patch ready to In Progress
- Assignee changed from Miroslav Fidler to Zbigniew Rebacz

NoRoundSize option was explicitly created for FileSel :)

I am not sure what you men by "not well fitted". I have add NoRoundSize because I have not liked empty space at the bottom of ColumnList.

Mirek

#2 - 02/10/2014 11:52 PM - Zbigniew Rebacz

- Status changed from In Progress to Rejected

It seems that it was intentional.

Bug is rejected.
