Category:	IDE		**Estimated time:**	0.00 hour
Target version:			**Spent time:**	0.00 hour

Description

It seems that IDE version numbering works only on M$ Windows. Can we fix it?

Current POSIX version of file ide/version.h:

    #define IDE_VERSION   ""

History

#1 - 06/14/2015 10:58 PM - Zbigniew Rebacz

This can be implemented easily with svn after-commit hook or something simmular.

#2 - 11/02/2015 09:08 PM - Zbigniew Rebacz

- Status changed from New to Rejected
