

U++ - Bug #795

Revision 7461 breaks TheIDE on GCC

06/23/2014 07:24 PM - Jan Dolinár

Status:	Approved	Start date:	06/23/2014
Priority:	Normal	Due date:	
Assignee:	Jan Dolinár	% Done:	0%
Category:	IDE	Estimated time:	0.00 hour
Target version:		Spent time:	0.00 hour
Description			
<p>Older versions of GCC have trouble building ide/Debuggers/Gdb_MI2.cpp after recent changes in ide.h, introduced in r7461:</p> <pre>[830s] In file included from /usr/src/packages/BUILD/uppsrc/ide/Debuggers/Gdb_MI2.cpp:2:0: [830s] uppsrc/ide/ide.h:1065:20: error: declaration of 'void Ide::Display()' [-fpermissive] [830s] In file included from uppsrc/Draw/Draw.h:896:0, [830s] from uppsrc/RichText/RichText.h:4, [830s] from uppsrc/CtrlCore/CtrlCore.h:4, [830s] from uppsrc/CtrlLib/CtrlLib.h:4, [830s] from uppsrc/ide/Common/Common.h:5, [830s] from /usr/src/packages/BUILD/uppsrc/ide/Debuggers/Debuggers.h:4, [830s] from /usr/src/packages/BUILD/uppsrc/ide/Debuggers/Gdb_MI2.cpp:1: [830s] uppsrc/Draw/Display.h:1:7: error: changes meaning of 'Display' from 'class Upp::Display' [-fpermissive]</pre>			
<p>It fails on almost all the platforms for which I create packages, with exception of Arch where the GCC is version 4.9. Versions 4.4 and 4.7 do not work.</p>
