<b>Description</b>			
Two help icons next to each other look strange in IDE bar...			
In ide/idebar.cpp (line 574):			
<pre>menu.Add(AK_BROWSETOPICS_WIN, Idelmg::help(), THISBACK(ShowTopicsWin));</pre>			
Should be			
<pre>menu.Add(AK_BROWSETOPICS_WIN, THISBACK(ShowTopicsWin));</pre>

I think we can make more accurate icon to this situation. The task here is to show that help is really in separate window. I made two new icons "help\_win" & "help\_win\_large".

If you decided to approve this solution you will also need to patch ide/Help.cpp (Here we need to add support for new icons normal & large to help window):

```
void Ide::ShowTopicsWin()
{
    windoc.Icon(Idelmg::help_win(), Idelmg::help_win_large());
    if(windoc.IsOpen())
        windoc.SetForeground();
    else {
        windoc.SyncDocTree();
        windoc.GoTo(sTopicHome);
        windoc.OpenMain();
    }
}
```

```
}  
}
```

P.S.  
I am sure that ShowTopicsWin is not the best place for setting icon for window. In my opinion we should set icon, only once per window life.
