Target version:		**Spent time:**	0.00 hour

Description

Since the changes in Find&Replace, TheIDE fails to compile on Linux:

```
[  670s]    Compiling /usr/src/packages/BUILD/uppsrc/CodeEditor/FindReplace.cpp
[  671s] /usr/src/packages/BUILD/uppsrc/CodeEditor/FindReplace.cpp: In member function 'virtual bool
Upp::FindReplaceDlg::Key(Upp::dword, int)':
[  671s] /usr/src/packages/BUILD/uppsrc/CodeEditor/FindReplace.cpp:57: error: no matching function for call to
'findarg(Upp::dword&, Upp::<anonymous enum>, Upp::<anonymous enum>)'
```
