Description

This bug can be ovserved when we wamt to set breakpoint. In this case cursor image shouldn't be changed.

Investigation:
```
    void EditorBar::LeftDown(Point p, dword flags)
    {
        if(p.x > GetSize().cx - annotations)
            WhenAnnotationClick();
        else
        if(editor)
            editor->LeftDown(Point(0, p.y), flags); // <- This invocation causes problems. Probably "SetCapture" in LineEdit::LeftDown is
    problem.
    }
```
