Description

For example in IDE the process look like this.

- Mouse enter menu bar (Menu Bar has got focus)

- Menu bar item is open

- Mouse move to another menu entry.

  - Focus Lost

  - Code Editor paints caret (This generate something like lag effect!)

- Another menu bar item is open

Moving fast from menu items generate flashing caret in code editor.

- Assignee set to Miroslav Fidler

- Priority changed from Normal to High

It seems to be GTK back-end problem (Not tested on X11.

- Category changed from CtrlLib to CtrlCore

#4 - 02/27/2015 12:05 PM - Zbigniew Rebacz

On X11 also OK.

What do you mean by "hardly blocker"?

#7 - 02/28/2015 11:11 PM - Miroslav Fidler

You told me you are assigning all things to be resolved before release "High" priority.

I do not thing this blocks the release.
